

## 02-页面样式接口

### 作用

获得一个页面的详情内容的html代码片段

### 接口

`/rest/gearsapi/1.0/pages/{pageId}/css`

### 方法

get

### 示例

- 调用地址

`http://localhost:1990/confluence/rest/gearsapi/1.0/pages/65552/css`

- 结果

```
@page
```

```
{
```

```
    size: letter;
```

```
    margin: 0.5in;
```

```
    padding: 1em;
```

```
    @top-left
```

```
    {
```

```
        content: element(header);
```

```
    }
```

```
    @bottom-left
```

```
    {
```

```
        content: element/footer);
```

```
    }
```

```
}
```

```
@page title
{
    margin: 0.5in;
    padding: 1em;

    @top-left
    {

    }

    @bottom-left
    {

    }
}

p {
    page-break-inside: avoid;
}

a
{
    color: #0052cc;
    text-decoration: none;
}

a . grey
```

```
{  
    color: #666;  
}  
  
body  
{  
    margin: 0;  
    padding: 0;  
    font-family: ConfluenceInstalledFont, Helvetica, Arial, sans-serif;  
}  
  
/* table view for several macros*/  
.tableview td  
{  
    border-color: #CCCCCC;  
    border-style: solid;  
    border-width: 0 0 1px;  
    margin: 0;  
    padding: 4px 10px 4px 5px;  
    text-align: left;  
}  
  
/* built in gallery macro */
```

```
div.gallery > table
```

```
{  
    display: table-cell;  
}
```

```
div.gallery > table > tr
```

```
{  
    display: inline;  
}
```

```
div.gallery > table > tr > td
```

```
{  
    display: inline;  
}
```

```
div.gallery > table > tr > th
```

```
{  
    display: inline;  
}
```

```
div.gallery > table > tr:first-child
```

```
{  
    display: block;  
}
```

```
pre
{
    white-space: pre-wrap;
}

div.panelMacro
{
    page-break-inside: avoid;
}

/* wraps the section columns underneath each other so they don't run off the page */
table.sectionMacro
{
    display: block;
}

table.sectionMacro > tbody
{
    display: block;
}

table.sectionMacro > tbody > tr
{
    display: block;
```

```
}
```

```
table.sectionMacro > tbody > tr > td
```

```
{
```

```
    display: block;
```

```
}
```

```
table.sectionMacro > tbody > tr > td
```

```
{
```

```
    width: 98%
```

```
}
```

```
table.sectionMacroWithBorder
```

```
{
```

```
    display: block;
```

```
}
```

```
table.sectionMacroWithBorder>tbody
```

```
{
```

```
    display: block;
```

```
}
```

```
table.sectionMacroWithBorder > tbody > tr
```

```
{
```

```
    display: block;
}
```

```
table.sectionMacroWithBorder > tbody > tr > td
{
    display: block;
}
```

```
table.sectionMacroWithBorder > tbody > tr > td
{
    /* why 99 you ask? because the right border won't show in the export up if it's
    100 */
    width: 99%
}
```

```
body.content-preview
{
    background-color: #fff;
    border: none;
}
```

```
body, li, table, .bodytext, .stepfield
{
    font-size: 10px;
    color: #000;
```

```
font-weight: normal;  
  
word-wrap: break-word;  
}
```

```
table tr td ul
```

```
{  
  
margin-left: -30px;  
}  
}
```
