Sync Settings

Synchronization lets you keep in sync the due dates in OKR Roadmap with corresponding Jira issue fields. Settings defined here apply to all issues which were added to OKRs.

When enabled, task synchronization is bi-directional and instant. For example, if you move an issue using the OKR Roadmap, your issue's "Start Date" and "End Date" fields will be updated. Conversely, if you edit the "Start Date" or "End Date" fields via the Jira issue view, the issue changes will be updated and visible in the OKR Roadmap.
