

14-价值设定

可以在路线图上定义的每个目标分配价值，以便在它们之间权衡目标。它可能有助于传达这些权重决策背后的策略和背景。为了符合SAFe，建议在路线图模块中配置BV的可用性：

- 为团队PI目标打开BV
- 关闭其他目标（采购项目PI目标、采购项目迭代目标、团队迭代目标）的BV

Business Value

Business Value ?

You are allowed to assign Business Value to each objective you defined on your Roadmap in order to weight objectives between themselves. It may help you to communicate the strategy and context behind these weighting decisions. In order to be compliant with SAFe®, it is recommended to configure availability of BV within Roadmap module as follows:

- switch on BV for Team PI objectives.
- switch off BV for other objectives (Program PI objectives, Program Iteration goals, Team Iteration goals).

☒ Program PI objectives

☒ Team PI objectives

☒ Program Iteration goals

☒ Team Iteration goals
