6 item, Page size 200 ,No 1/1 pages.

Notice

- Attachment view function

We don't record the user's behavior of viewing images, because a large number of images in the page will cause the recorded information to be out of focus.

Image formats include: JPG, PNG, SVG and so on.

- login ip

If you use nginx or Apache, the IP address of login may not be prepared, which may be a defect of confluence. This problem does not exist if the user accesses confluence directly

or maybe you can set the conf like the below

```
location / {  
    proxy_redirect off;  
    proxy_set_header Host $host;  
    proxy_set_header X-Real-IP $remote_addr;  
    proxy_set_header X-Forwarded-For $remote_addr;  
}
```
