Groups	Actions
<input type="text"/>	<button>Add</button>
confluence-users	<button>Remove</button>

The below user can download attachment

Users	Actions
<input type="text" value="user01"/>	<button>Add</button>

For Anonymous users

have permission: ☐

no permission: ☒

This feature can be enabled for a specific space. After enabled, you can forbid user in group to download attachments .

After setting, the users in group cannot download the attachment.

but the users can preview the file (word, PPT, Excel, PDF, txt), but they can't download it.

You can exclude users from the user group who are prohibited from downloading attachments and enable them to download attachments.

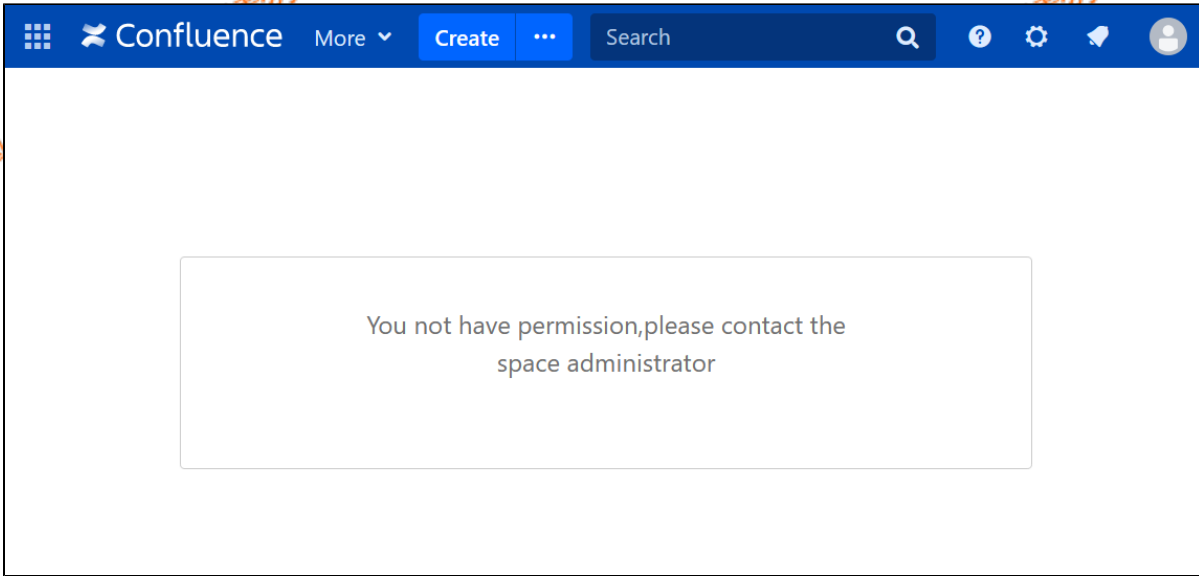

For Anonymous users

You can prevent anonymous users from downloading attachments.

Download Tips

We can see the existence of the attachment, can preview it, but can not download them.

if you download it, a prompt page will be displayed

or

download a file named nopermission.action

Here, we can't use the right mouse button to download PDF documents, but we can disable page copying
