### Eligibility and Software Maintenance

Software maintenance covers access to support and software product updates for the corresponding software license. Refer to your applicable [Cloud Terms of Service](#) or [Software License Agreement](#) for specific terms of agreement. **After the active maintenance period expires, the software will continue to function, but you will no longer be able to access support or software updates (including security bug fixes).** Note that starter licenses include community support only.

Support is open to system administrators and account holders. End-users will be redirected to a system administrator.

See Atlassian's [bug fixing](#) and [Atlassian Security Bug Fix Policy](#) policies for further discussion.
