

01-Maximum hours one day

The maximum worklog per day can be set as a global parameter.

By default, the maximum work for a project is constrained globally, and specific projects are constrained by project settings.

In this page, we can set the global default parameters and also allow to set the limit settings for each JIRA project.

if select (B) sum all project enable, The sum of working hours in all projects of JIRA site need to satisfy the setting

After setting, we will give a prompt if the working hours are not within the set range

Log Work: DEMO-1

You have been worklogged 9.25 hours, the maximum is 20.0 hours one day

Time Spent*

15

(eg. 3w 4d 12h) ?

An estimate of how much time you have spent working.

Date Started*

28/Feb/18 10:43 PM

Remaining Estimate

☒ Adjust automatically

the estimate will be reduced by the amount of work done, but never below 0.

☐ Use existing estimate of 0d

☐ Set to (eg. 3w 4d 12h)

There are two ways to worklog

- worklog directly on the issue page
- worklog in the pop-up pages of issue workflow

To worklong in to the pop-up pages of workflow , you need to add "Check Worklog" validation.
